The result was the adoption of a resolution to the effect that the Speaker appoin a Select Committee of nine men, to be called the World's Fair Committee, to which shall be referred all that relates to the proposed quadri-centennial celebration of the discovery of America. Mr. Frowen also introduced his World's

Fair bill, which will be referred to this Special Committee when it is appointed. This is a slight setback for Chicago. which wished the matter to be in the hands of the Foreign Affairs Committee. The judicious selection of the nine may be safely left to Mr. REED, and as the nine go to the bat New York may coun on enough good batting to win the game. THE GREAT BILL.

The Children's Bill cannot be too promptly attended to in Albany. It was agitated enough last year to have made its points familiar to most of the legislators, and now that the patent justice of its demands are sanctioned by the approbation and indorsement of the President of the Society for the Prevention of Cruelty to Children it should not lag

Put it through quickly, gentlemen. There is no reason why a good thing should be accomplished in a listless, loitering way. Other things being equal. they act best who act quickest. Show yourselves good actors.

## PORTUGAL A SUPPLIANT.

There is a certain pathos in the spec tacle of little Portugal flying to that dear old fairy, OTTO VON BISMARCK, showing the ugly stamp of Britain's iron heel upon her tiny frame, and beseeching that festive ogre to turn England into confusion and make it lift its heel.

The sun may never set on Britain's rise in the more restricted space of SALISsuar's mind. He has treated the poor little Kingdom of Portugal with a snubbiness greater than he would have shown to a powerful African chief. If BIRMARCE will only do something for

Portugal!

# NOMS DE PLUME OUT OF DATE

Now Write Under Their Own ING WORLD. There seems every reason to believe

that the day of the nom de plume in literature has gone by, says the Philadelphia Times. Authors of established repu tation are in several cases discarding their pen names, while the younger writers are for the most part using their own signs In fact, when one comes to look ove

the field there is not a modern author of the field there is not a modern author of repute completely screened behind an assumed name. "The Duchess" up to within a short time succeeded in keeping her identity veiled. She is, however, now writing under her own name as Margaret Hungerford.

"J. S., of Dale," has entirely discarded that name, and all his books will here, after be published under his own name. "Sydney Luska" appends his real name now to all his books.

"Ouida" is writing her first article under her own signature of Louise de la itamee. Marion Harland, lk Marvel, Mrs. Alexander, Mark Twain. Jennie June, Edna Lyall—all these are now becoming merely the shadow of the real names which they once so effectually screened from public knowledge.

The reasons for this change of feeling are several. First authors are realizing.

Secondly, writers are becoming more convinced that the strength of one's personality in their work is an essential of Thirdly, publishers are more reluctant to place pseudonyms on the title pages of their author's books than they were fifteen
